PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 4+ years architecting and delivering enterprise-grade web applications, multi-tenant SaaS platforms, secure RESTful APIs, and cloud-native infrastructure on AWS. Proven track record across Government, HRMS, CRM, LMS, ERP, and SaaS domains, engineering systems trusted by thousands of active users.

Expertise spans the full delivery lifecycle: system design and architecture, cloud infrastructure (EC2, S3, RDS, Auto Scaling), CI/CD automation, database optimization on 10M+ row datasets, payment gateway integration, JWT/OAuth2 security, and multi-tenant RBAC. Adept at leading architecture decisions independently and shipping high-impact products on schedule.

CORE COMPETENCIES

- | | | |
|--------------------------------|-------------------------------|-------------------------------------|
| ▪ System Design & Architecture | ▪ Multi-Tenant SaaS | ▪ AWS Cloud (EC2 / S3 / RDS) |
| ▪ RESTful API Development | ▪ CI/CD Automation | ▪ Database Optimization (10M+ rows) |
| ▪ JWT / OAuth2 Security | ▪ Payment Gateway Integration | ▪ RBAC & Access Control |

TECHNICAL SKILLS

Backend	PHP 8.x, Laravel (Eloquent ORM, Middleware, Service Providers, Artisan, Queues, Events), Node.js, Express.js, Core PHP, .NET Core 6 (C#), CodeIgniter, CakePHP, Python (Automation, Backend Scripting, AI Integration, Data Processing), FastAP. Generative AI (GenAI), Large Language Models (LLMs), OpenAI API Integration, AI Chatbot Development, Prompt Engineering, AI-powered Application Development, AI Agents Integration, RAG (Retrieval Augmented Generation) Concepts, Machine Learning Fundamentals, Predictive Analytics, Data Preprocessing, Model Integration, AI-based Automation, Python Libraries (NumPy, Pandas, Scikit-learn), AI API Integration
Frontend	Vue.js, React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, jQuery, AJAX, Blade Templates
API & Auth	RESTful APIs, JWT Authentication, OAuth2, Auth0/SSO, Laravel Sanctum & Passport, API Rate Limiting, CORS, OpenAI/LLM APIs, Prompt Engineering
Cloud & DevOps	AWS EC2 (Auto Scaling, Load Balancers), AWS S3, AWS RDS, CloudWatch, Linux/Ubuntu, Nginx, Docker (Fundamentals), GitHub Actions CI/CD, Git, Bitbucket, Vercel, Railway, MongoDB Atlas
Database	MySQL (Query Optimization, Indexing, Transactions, Stored Procedures), MongoDB, Redis Caching, NoSQL, Eloquent ORM, Prisma ORM, Performance Profiling
Security	RBAC, Laravel Gates & Policies, Spatie Permission, Multi-Tenant Architecture, AES-256 Encryption, HTTPS/TLS, Firewall, Security Hardening, Audit Logging
Integrations	Razorpay, Recurly, Rebilly, XPay (Subscriptions & Webhooks), Twilio SMS OTP, MSG91 OTP, Aadhaar KYC, Email APIs
Architecture	System Design, Microservices, Multi-Tenant SaaS, Event-Driven Architecture, WebSockets, Unit Testing, Performance Optimization
Windows / Desktop	Windows Desktop Application Development (C#, WinForms), .NET Core 6, OMR-Based Data Processing, Image Processing Fundamentals

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer — Wings Pharmaceuticals, Delhi	May 2026 – Present
- Architected end-to-end AWS cloud infrastructure — EC2 Auto Scaling groups, Application Load Balancers, S3 file storage, RDS managed database, and CloudWatch monitoring — supporting enterprise pharmaceutical platforms serving internal and external stakeholders. - Led system design and architecture planning for greenfield scalable applications, defining data models, API contracts, and deployment strategies from day one.	

- Built and optimized RESTful APIs and integrated third-party services with full security hardening: HTTPS, WAF firewall rules, and granular RBAC enforcement.
- Implemented MSG91 SMS-based two-factor authentication (2FA) — OTP generation, delivery, verification, expiry handling, and retry logic — eliminating unauthorized access vectors.
- Engineered SQL query optimizations across large-scale datasets (10M+ records per table), significantly improving execution times and reducing database load on high-traffic endpoints.
- Developed Node.js / Express.js microservices with MongoDB for business-critical workflows, designing scalable RESTful APIs and authentication flows.
- Managed Linux (Ubuntu) server environments — Nginx configuration, cron scheduling, and automated CI/CD deployment pipelines via GitHub Actions.

Laravel Developer (SaaS) — Learnfly — GETYN SaaS Platform, Delhi

May 2025 – Apr 2026

- Owned end-to-end maintenance and feature evolution of the GETYN multi-product SaaS ecosystem, maintaining 14+ live production projects simultaneously.
- Architected multi-tenant SaaS applications with isolated data environments, tenant-aware middleware, and per-tenant RBAC — enabling secure data segregation across all client workspaces.
- Integrated 4 payment gateways (Rebilly, Recurly, Razorpay, XPay) for subscription billing and one-time payments, including full webhook lifecycle management and payment failure recovery flows.
- Secured all APIs using JWT Authentication and OAuth2 (Auth0/SSO); enforced granular role and policy management via Laravel Gates & Policies and Spatie Permission.
- Implemented Twilio SMS-based OTP two-factor authentication — generation, delivery, verification, and expiry — reducing account compromise risk.
- Improved database performance through Eloquent ORM query tuning, eager loading strategies, and Redis caching, reducing average API response latency.
- Configured CI/CD pipelines via GitHub Actions, reducing manual deployment effort and enabling zero-downtime releases.
- Built auxiliary Node.js / Express.js services backed by MongoDB for event logging, webhook processing, and real-time notifications across the GETYN product suite.

Full Stack Laravel Developer — Multigraphics Group, Delhi

Feb 2023 – Apr 2025

- Delivered 18+ enterprise projects across ERP, CRM, LMS, HRM, and Government portal domains using Laravel and Core PHP, from requirements through production.
- Engineered a proximity-based automated exam center allocation algorithm for 10,000+ applicants, eliminating 70% of manual assignment effort and cutting processing time from days to minutes.
- Optimized MySQL query design and schema architecture, achieving 40% performance improvement on high-traffic API endpoints.
- Architected a Google Drive-style enterprise document storage system with nested RBAC, file versioning, AES-256 encryption, and audit trail logging.
- Built a comprehensive Role & Permission Management system with dynamic role creation, module-level permissions, and middleware-guarded route protection.
- Integrated Aadhaar KYC verification, SMS/Email transactional APIs, and Twilio-compatible channels for secure identity verification and notification workflows.
- Built supporting Node.js / Express.js microservices with MongoDB for real-time notification and reporting modules, extending core Laravel applications with lightweight, high-throughput services.
- Developed a standalone Windows desktop application (C# / WinForms) for automated OMR-based result processing — scanning answer sheets, evaluating responses, and generating result sheets for 10,000+ candidates.

.NET Developer — KKM Infra Pvt Ltd, Noida

Jan 2022 – Feb 2023

- Contributed to a Construction Management System (.NET Core 6 / C# / SQL Server), developing modules for contractor registration, project management, material requisition, and work order tracking.
- Developed a Windows desktop application (C#, .NET Core 6, WinForms) for construction material calculation — automating quantity takeoff, material cost estimation, and requisition generation for site engineers and project managers.
- Designed and implemented database stored procedures, SQL queries, and schema for project, contractor, and inventory data, ensuring data integrity and query performance.
- Implemented role-based access control (RBAC) for multi-stakeholder login, differentiating access across project managers, site engineers, and administrators.
- Participated in full SDLC — requirements, development, testing, UAT, and deployment — building foundational skills in enterprise software delivery.

KEY PROJECTS

HR Management System (HRMS) | [nex-hrm.vercel.app](#)

Full-cycle HRMS with talent acquisition, campus hiring, payroll, attendance, and performance tracking.

- Built recruiter module: job posting, ATS, interview scheduling, and offer management with role-based pipelines.
- Developed RBAC-driven dashboards for HR Managers, Recruiters, Department Heads, and Employees.

Tech Stack: Laravel, MySQL, Vue.js, React.js, REST APIs, AJAX

BUHS Entrance Exam Portal — Government Portal | [buhset.in](#)

High-stakes government portal (Bihar University Health Sciences) managing 10,000+ applicants with automated exam logistics.

- Engineered a proximity-based algorithm for automated exam center allocation, eliminating 100% of manual assignment workload.
- Implemented OTP authentication, secure registration, and role-based admin/staff access with audit logging.

Tech Stack: Laravel, MySQL, Blade, AJAX, SMS API

OMR-Based Automated Result Processing System (Windows Desktop App)

Standalone Windows desktop application for scanning and evaluating OMR answer sheets and generating results at scale for 10,000+ candidates.

- Built OMR sheet scanning and image-processing logic to detect marked responses and auto-evaluate answers against answer keys.
- Designed batch result generation, score computation, and exportable report sheets, cutting manual evaluation effort from days to hours.

Tech Stack: C#, WinForms, .NET Core 6, SQL Server

Construction Material Calculator (Windows Desktop App)

Windows desktop application built for KKM Infra to automate material quantity takeoff and cost estimation for construction projects.

- Automated quantity takeoff and material cost calculation based on project specifications, reducing manual estimation effort for site engineers.
- Generated material requisition sheets directly from calculated estimates, streamlining procurement workflows.

Tech Stack: C#, WinForms, .NET Core 6, SQL Server

GETYN Multi-Product SaaS Platform | [getyn.com](#)

Enterprise multi-tenant SaaS ecosystem with 4 payment gateway integrations and real-time uptime monitoring.

- Designed multi-tenant data isolation architecture with tenant-specific customizations and live alerting infrastructure.
- Integrated Rebilly, Recurly, Razorpay, and XPay for subscription billing and full webhook event processing.

Tech Stack: Laravel, PHP, MySQL, REST APIs, React.js, Razorpay, Recurly, PayPal

Enterprise Document Storage System (Google Drive Clone)

Secure cloud storage platform with nested folder hierarchy, RBAC, file versioning, and full audit trails.

- Built upload/download/rename/move via AJAX with AWS S3 integration, AES-256 encryption, and activity logging.

Tech Stack: Laravel, MySQL, AWS S3, Blade, RBAC, AES-256 Encryption

Custom CRM — Lead Management & Analytics Dashboard

Full-featured CRM with lead tracking, customer profiling, automated follow-ups, and real-time analytics.

- Implemented JWT-secured endpoints, User & Role Management, activity logs, and real-time lead pipeline dashboards.

Tech Stack: Laravel, MySQL, JavaScript, Blade, AJAX

EDUCATION

Master of Computer Applications (MCA) 2021 – 2023

Dr. A.P.J. Abdul Kalam Technical University (AKTU)
